

Cranberry Seedlings

GIVE US A CALL AND LET US HELP YOU GROW YOUR BUSINESS.

Cranberry producers...PRT, North America's largest producer of forest seedlings, is proud to introduce a new growing service...the propagation of cranberry plant material into cranberry starter plants. This will be of particular interest to cranberry growers wishing to quickly and efficiently utilize new cranberry strains to establish cranberry production fields. PRT can provide cranberry rooted cuttings to producers anywhere in North America.

Who is PRT: We are container seedling experts and have produced in excess of one billion plants over the past 20 years. Recently PRT has applied their growing expertise to propagation of cranberry plants from cuttings. PRT has produced well over 1 million cranberry rooted cuttings.

Where we are: PRT has nursery locations across Canada and in the US with greenhouse and outdoor growing compounds.

What we offer: Upon reception of cranberry growing material, PRT propagates cranberry cuttings in horticultural trays for delivery to the field. These trays offer adaptability to mechanical transplanters. We specialize in custom growing solutions producing seedlings to our customer's exact growing specifications. You tell us what you want and we'll do it!
